To: ADNI3 Principal Investigators, Study Coordinators and Regulatory
From: Alzheimer's Therapeutic Research Institute (ATRI)
Date: January 8, 2020
Subject: ADNI Acknowledgement List

Dear Principal Investigators, Study Coordinators, and Regulatory,

The ADNI Data and Publications Committee (DPC) references the ADNI acknowledgement list on papers that are published using ADNI data. The DPC would like to ensure that past and present investigators are listed correctly and properly acknowledged.

It has been over a year since we last updated the acknowledgement list and I am writing now to ask you to provide updated information for your site. It is very important to us that you and your team are appropriately acknowledged for all ADNI publications, so please take a moment to carefully review "Part B: Investigators by Site" found on pages 4-11 of the document at the link listed below:

http://adni.loni.usc.edu/wp-content/uploads/how_to_apply/ADNI_Acknowledgement_List.pdf

Please provide up to three names of active investigators and professional degrees (e.g. John A. Smith, MD, MPH) as well as the names of past investigators to the ADNI DPC Administrative Coordinator, Charlene Preys (clpreys@bwh.harvard.edu) by **January 21, 2020**. If your team has not changed, please email Charlene to indicate "No changes."

As you know, the ADNI DPC tracks all publications that utilize ADNI data and lists them at the following sites:

<http://adni.loni.usc.edu/news-publications/publications/>

Each of you should cite these publications within a "Peer reviewed research publications without named authorship" section on your CV. If you have any questions about the acknowledgement

list or publications committee, please do not hesitate to contact me.

Sincerely,

Erin Drake
For the ADNI DPC
